SUMMARY

Cloud/DevOps Engineer with **10 months** of hands-on **AWS** experience and the **AWS Solutions Architect – Associate** certification. Skilled in **Docker**, **Kubernetes**, **Terraform**, **CI/CD** and **DevSecOps** pipelines, **Linux**, and **Prometheus & Grafana** monitoring.

TECHNICAL SKILLS

Cloud (AWS): EC2, VPC, IAM, S3, RDS, ALB, Auto Scaling, ECR, EKS, Lambda, DynamoDB, SQS, Route 53, CloudTrail
Containers & Orchestration: Docker, Kubernetes (Deployments, Services, Ingress, HPA, Probes), Helm
Infrastructure as Code: Terraform (Modules, Remote State, S3 Backend)
CI/CD: Jenkins, GitHub Actions
Linux & Networking: RHEL/Ubuntu, TCP/IP, DNS, HTTP/HTTPS, Subnets, Route Tables, Security Groups, NAT Gateway
Monitoring & Observability: Prometheus, Grafana, AWS CloudWatch
DevSecOps & Security: SonarQube, Trivy
Scripting & Version Control: Bash, Git, GitHub

EXPERIENCE

Junior Cloud Engineer — Remote
Engiplex Solutions — *Oct 2025 – July 2026*

- Managed **AWS** operations across **15+ EC2 instances** and **3 VPCs**, including patching, snapshots, Security Group and IAM changes, and target-health checks under least-privilege and change-management procedures; built **Lambda, SNS, SQS, and DynamoDB** automations like scheduled EC2 start/stop, **cutting non-production costs by about 25%**.
- Containerized **6+ applications** with **Docker** (multi-stage builds, **image size reduced by about 40%**) and deployed them on **EKS**/**ECS** via **ECR** and **Helm**; fixed CrashLoopBackOff and ImagePullBackOff with kubectl, **cutting recovery time to under 15 minutes**.
- Automated infrastructure with reusable **Terraform** modules (S3 remote state, DynamoDB locking) and maintained **8+ Jenkins and GitHub Actions** pipelines with **SonarQube and Trivy** checks, **cutting deployment time from about 30 to 10 minutes**.
- Monitored CPU, disk, memory, and service health with **CloudWatch, Prometheus, and Grafana** (**20+ alarms and dashboards**); resolved **30+ incidents** (connectivity, disk-space, permissions) on **RHEL**/**Ubuntu** servers using network debugging and **Bash**, escalating by severity and documenting **10+ runbooks**.

PERSONAL PROJECTS

BrewSecOps — Secure Cloud-Native Deployment on AWS & Kubernetes
(Jenkins, Docker, Kubernetes, Amazon EKS, Helm, AWS ECR, SonarQube, Trivy, Terraform, Prometheus, Grafana)

- Built an end-to-end **DevSecOps CI/CD pipeline** in Jenkins that runs a SonarQube quality gate, OWASP Dependency-Check, Trivy image scan, Docker build, and **Amazon ECR** push automatically on every commit.
- Deployed the app on **Amazon EKS** with Helm, Ingress, health probes, and **HPA** for repeatable releases and automatic scaling.
- Provisioned the monitoring server on **AWS EC2** using **Terraform**, and set up **Prometheus and Grafana** dashboards with alerts for **5+ failure scenarios** (pod failures, high resource usage, service unavailability).

Production-Grade 3-Tier Web Application on AWS
(AWS, EC2, VPC, ALB, Auto Scaling, RDS, NAT Gateway, IAM, Security Groups, CloudWatch)

- Deployed a highly available 3-tier architecture across multiple **Availability Zones**: public subnets for the **ALB**, private subnets for the app tier (**ASG**) and database, with least-privilege **IAM roles and Security Groups**.
- Configured **RDS MySQL Multi-AZ** and **CloudWatch** monitoring for database reliability and infrastructure health.

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (SAA-C03) • Verify on Credly — 2026

EDUCATION

Shri Guru Gobind Singhji Institute of Engineering and Technology — Nanded, India
B.Tech in Information Technology, CGPA: 8.0/10 — *2021 – 2025*
